30 January 2025

Proposal for one (1) UH-60A+/L Black Hawk Helicopter, and optional mission equipment for customer.

We respectfully offer the enclosed information for your consideration to provide UH-60A+/L Black Hawk helicopter to its customer. An execution of this offer may require export approval from the U.S. Department of State for aircraft exported outside the United States, something we are very familiar with because of our previous exports. The offer is detailed in the attachments and explained below:

- Attachment 1 is a summary of our offer for one (1) Fully Mission Capable UH-60A+ or UH-60L Black Hawk Helicopter with ROM pricing
- Attachment 2 is a summary of the Optional Mission Equipment with ROM pricing

The aircraft already in our possession, is capable of immediately beginning the process of inspection, repair, modification, and certification of the UH-60A+/L Black Hawk helicopter. Our experienced team will quickly complete the required phased maintenance inspections, paint the aircraft and add modifications to enhance mission success. We are confident that the quality of our product will set us apart from the competition and will result in a safe and reliable aircraft. Our cost-effective solution will result in a proven commercial/combat aircraft to meet your operational mission needs.

## **ATTACHMENT 1**

### **SUMMARY OF AIRCRAFT**

1. Our business has an unparalleled capability to provide expeditiously the UH-60A+/L Black Hawk helicopter for its customers. With aircraft already in our facility the delivery schedule is greatly reduced. Aircraft and aircraft records will be available for End User's representative to conduct technical inspections. The base aircraft description is:

*Hangar 1 –*

*Hangar 3 –*

The base aircraft configuration is described below and subject to change dependent on customer requirements. The Optional Mission Equipment configuration of the aircraft is identified in detail in Attachment 2.

- Base aircraft will be stripped of existing paint and painted in a single-color and decals as approved by the end user.
  - Base aircraft Main and Tail Rotor Blades will be inspected, repaired and painted black or high visibility based on customer preference.
  - Base aircraft will receive a Phased Maintenance Inspection and all required calendar inspections IAW current UH-60 Technical Manuals and PMI manual.
  - All life limited components, in accordance (IAW) with Section II of LIDO-202 Rev A, dated 10 March 2017, will have a minimum of 750 hrs. life remaining.
  - Base aircraft will be delivered with the two (2) Garmin GTN750 GPS/Nav/Comm/MFD platform and one (1) GTX345R All-in-one Transponder Solution for ADS-B “Out” and “In”.
  - Base aircraft will be delivered with an Onboard System Cargo Hook & Load Cell.
  - Base aircraft will be delivered with an Emergency Locator Transmitter (ELT)
  - Aircraft will be issued a Restricted Category Type Certificate
    - The Aircraft shall be delivered EX WORKS in accordance with Incoterms 2010.
    - The aircraft and records are available for inspection and review in our facility.
    - The aircraft delivery schedule will be provided within 30 days of award and receipt of deposit.
2. In addition to the identified mission equipment and options, we also can provide initial flight training for pilots, as well as maintainer training, more detail will be provided in future correspondence.
  3. We also can provide technicians and logistics specialists to provide on-site training for End User personnel. Field Service Representative (FSR) and Field Service Team assistance can also be provided.
  4. Below is the breakdown of estimated pricing on base configured aircraft.
